Title : Efficiency of development of petroleum deposits

Periodical : Neft. Khoz., v. 32, #8, 7-11, Ag 1954

Abstract : This efficiency is analysed from the viewpoint of socialistic economy and under consideration of many complex problems related to national and industrial interests. The efficiency of production and of new developments are considered as generally affected by degree and duration of the utilization of the petroleum resources, the cost of materials, and of labor.

Title : Importance of placing more emphasis on the economic aspect in planning oil deposit exploitation

Periodical : Neft. khoz., v.33, no.3, 7-14, Mr 1955

Abstract : In planning the exploitation of oil deposits, factors determining the economy of the entire project must be carefully considered namely: the total amount of oil in the reservoir and the amount to be recovered, the most efficient stages of operation, time of their duration and rate of production as well as the amount of water to be pumped in for secondary recovery, etc. Further, the economy of the region must be analyzed, e.g., roads and means of transportation, sources of energy, already-existing industrial and housing facilities, and all other factors which may influence the rentability of the project.

Title : In quest of a planned exploitation of oil deposits
(a matter for discussion)

Periodical : Neft. khoz., v. 33, no. 8, 10-18, Ag 1955

Abstract : The author critically discusses the assumptions of
M. V. Mkrtchyan expressed in his article in this
journal, #2, 1955 in which he argued for a more
economical plan for the exploitation of oil deposits.
